

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

IV. *An Account of the Tubera Terræ, or Truffles found at Rushton in Northamptonshire ; with some Remarks thereon.* By Tancred Robinson, M. D. and R.S.S.

S I R,

THE *Tubera Terræ* (which you was pleas'd to send me, together with a Draught of them drawn with your own Pencil) observ'd lately at *Rushton* in *Northamptonshire*, by that curious and learned Gentleman Mr. *Hatton*, are indeed the true French *Truffles*, the Italian *Tartuffi* or *Tartuffole*, and the Spanish *Turmas de Tiera*, which are not noted by Mr. *Ray* to be found in our British Soyl. I have seen them thrice as large at *Florence*, *Rome* and *Naples*, where they eat them as a delicious and luxurious piece of Dainty, either fry'd in slices with Butter or Oil, Salt and Pepper ; or else out of Pickle, and often boyld in their Soup. Of these there are three or four Species mentioned by *Matthiæolus*, *Imperati*, *J. Bauhine* and *Mentzelius*.

These observ'd in *England* are all included in a studded Bark or Coat, the Tubercules resembling the *Capsules* or V.Fig. 4. Seed-Vessels of some *Mallows* and *Alcea's* ; the inward substance is of the consistence of the fleshy part in a young Chestnut, of a paste Colour ; of a rank or hircine Odour, and unsavoury, streaked with many white Veins V.Fig. 5. or Threds, as in some Animals Testicles ; the whole is of a globose Figure, though unequal and chinky.

What

What these *Trubs* are, neither the Ancients nor Moderns have clearly informed us; some will have them *Callosities*, or *Warts* bred in the Earth: Others call them subterraneous *Mushrooms*. If you could ever find *Vestigia* or Marks of a Stalk, or of Fibres, or Capillaments about their outsides, I should be then almost tempted to guess, that they are the Product of some Bulbose or Tuberosè Plant, perhaps a *Satyrium* or *Orchis*, or some other Root of that numerous Tribe, many of which have a Seminal Smell.

I conjecture that these *Tubera Terræ* were found after the late Thunder and Rains; for some of the Ancients call'd them *Ceraunia*, to which *Juvenal* seems to allude, *Sat. V.*

*Post hunc raduntur Tubera, si ver  
Tunc erit, & facient optata tonitrua cœnas  
Majores: tibi habe frumentum, Alledius inquit  
O Libye: disjunge boves, dum tubera mittas.*

They are most tender in the Spring; though after Showers and sultry Weather they may be plentifully found in the Autumn: the Wet swells them, and Lightning may dispose them to send forth their particular Scent so alluring to the Swine.

*Ludovicus Romanus*, *Navigat. Lib. 1. cap. 7.* affirms, That Thirty Camels Load of these *Truffles* or *Trubs* brought from *Armenia* and *Asia Minor* have been all sold at *Damascus* in two or three days. The manner of finding and rooting them up may be read in *Mr. Ray's Itinerary of Italy*, p. 403, 404. and in his *Catal. Stirpium Exot.* at the end of his Travels, p. 109.

I need not tell you the Uses to which the *Greeks* and *Romans* apply'd these Vegetable Bodies, nor how they are dress'd and eaten at this day. *Pliny*, *Martial*, *Plutarch*, *Athenæus*, *Galen*, *Apicius*, &c. may be consulted

for the first ; *Nonnus*, *Bruyerinus*, *Ciccarellus*, &c. for the last.

## POSTSCRIPT.

After the writing of the foregoing Letter, I received Intelligence, that Mr. *Hatton* observ'd Fibres issuing  
*V. Fig. 4.* out of some of these *Tubera*, which lay Spit deep under ground ; so that perhaps they may be *Plantæ sui generis*, and their sulcated *Papillæ* analogous to, if not Seed-Vessels. You know several Vegetables bear their Seed near the Root, as the *Trifolium subterraneum tricoccum reticulatum flosculis longis albis* ; most of the *Arachydnæ's*, and some other *Legumes*, which flower above, but seed under ground. As to the *Truffles* lying so deep, that is common to many Roots that shoot up Stalks above the Earth. To instance only in that *Lathyrus tuberosus*, call'd commonly *Chamæbalanus* and *Terræ Glandes* ; in English, *Pease-Earthenut*, digg'd up and eaten by the poor People, *Non nisi altâ fossione inveniendæ*, says *John Bauhine*. But for a clear History of these, our Judicious Mr. *Ray* may be consulted, *Histor. Plant. Vol. I. p. 895, 899, 918, 919, 942.*

The Roots of our *Bulbocastanum* (of the Umbelliferous Tribe) commonly call'd *Kepper-Nuts*, *Pignuts* and *Ger-nuts* in the North, lie very deep, and fatten Hogs, which are very greedy of them. I have often observ'd the Shepherds and Boys in *Yorkshire* digging them up for a delicate Dish : Perhaps this is the *Nucula Terrestris Septentrionalium* of *Lobel*, and the *Apios* of *Turner*.
